Domain Setting

Hosts

ns2.leakung.in.th
ns3.leakung.in.th
dns.leakung.in.th

Page: 1 of 1 pages. Page Size: 10

Add

4. Enter your name server data.

4.1 Enter nameserver(4.1) then the system will detect your nameserver automatically if your nameserver requires an IP address(es).

IP address(es) is required.

Domain = leakung.in.thNameserver = ns1.leakung.in.th

IP address(es) is not required.

Domain = leakung.in.thNameserver = ns1.dotarai.com

Hosts > Add new host.

nameserver: dns.leakung.in.th

IP address: 8.8.8.8 2001:db8:0:0:0:0:2:1

Add **Delete**

Back **Save**

Domain Setting

4.2 Enter nameserver's **Ip address(4.2)**

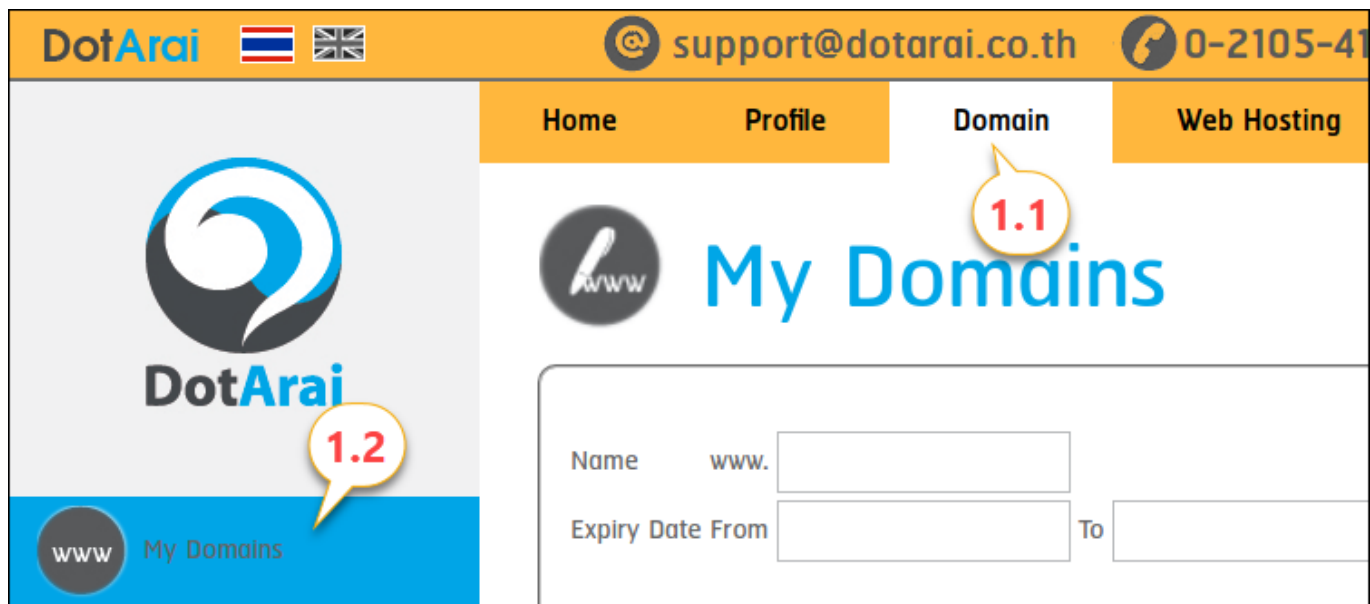

4.3 Click at the **Add(4.3)** button to add an IP address to the list below.

4.4 Click on Apply **changes(4.4)**

* If the nameserver is not required an IP address, please skip step 4.4.

Delete Host

1. Please login to your account and click on the **Domain (1.1)** then click on **My Domain (1.2)** menu.

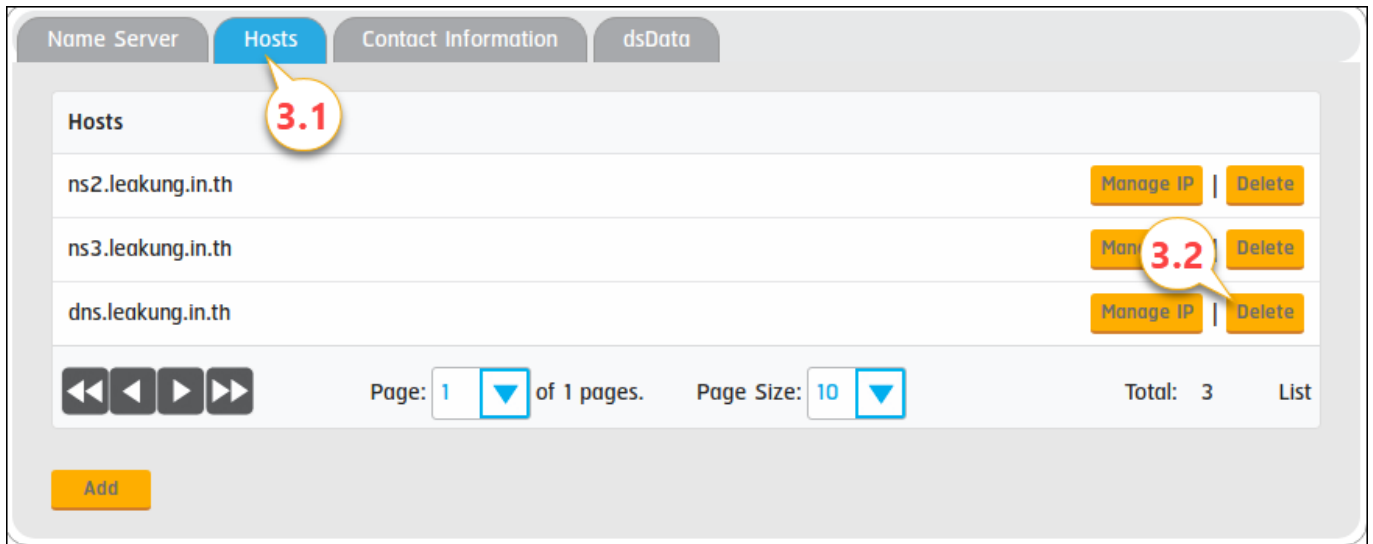

2. Click on **View (1.2)** next to the domain name that you would like it's host changed.

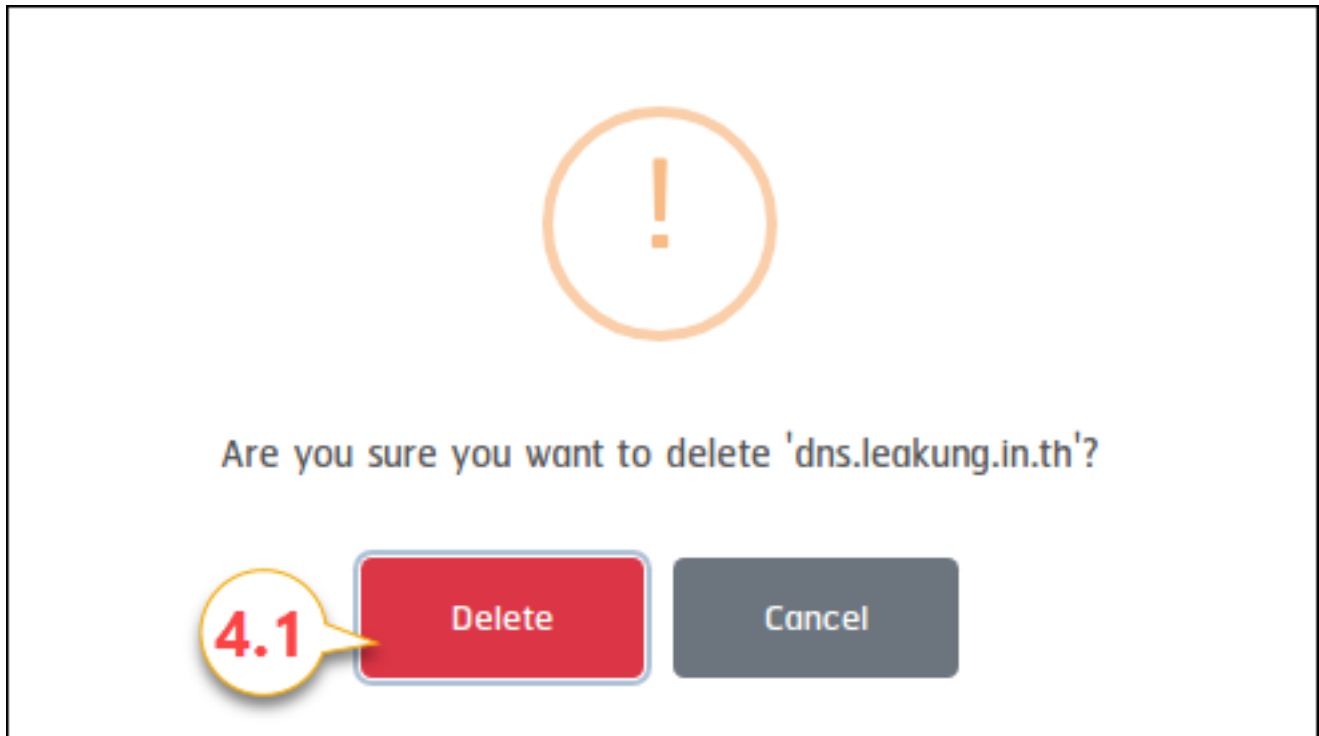

4	dotarai.com	22/12/2023	View	Renew
5	leakung.in.th	26/10/2029	View	Renew
5.1	คลัง.ท		View	
5.2	คลัง.ไทย		View	
6	reypadilla.com	21/08/2013	View	Renew

Manage host's IP address

1. Please login to your account and click on the **Domain (1.1)** then click on **My Domain (1.2)** menu.

Domain Setting

2. Click on **View (1.2)** next to the domain name that you would like it's host changed.

4	dotarai.com	22/12/2023	View	Renew
5	leakung.in.th	26/10/2029	View	Renew
5.1	คลัง.ท		View	
5.2	คลัง.ไทย		View	
6	reypadilla.com	21/08/2013	View	Renew

2.1

3. Click on **Hosts(3.1)** then click the **Manage Ip(3.2)** button.

Domain Setting

Domain Setting interface showing the Hosts tab. The Hosts list contains two entries: ns2.leakung.in.th and ns3.leakung.in.th. Callout 3.1 points to the Hosts tab, and callout 3.2 points to the Manage IP button for ns3.leakung.in.th. Navigation controls at the bottom show Page 1 of 1, Page Size 10, and Total 2 items.

4. How to add an Ip address.

4.1 Click on the **Add(4.1.1)** button.

Domain Setting interface showing the Hosts > IP address sub-tab. A table shows one IP address: v4, 192.168.1.1. Callout 4.1.1 points to the Add button at the bottom right.

4.2 Enter an **Ip Address(4.2.1)** then click the **OK(4.2.2)** button.

Please enter ip address.

2001:4860:4860::8844

OK Cancel

5. How to delete an IP address.

Domain Setting

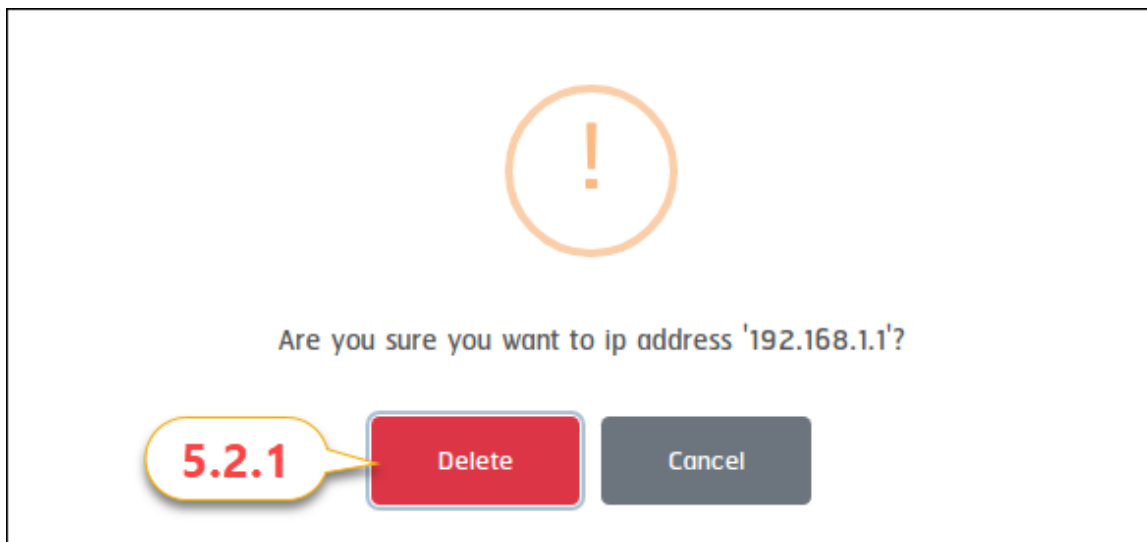

5.1 Click at the **Delete (5.1.1)** button on the row where your IP address is located.

The screenshot shows the 'Hosts' tab in the 'Domain Setting' interface. It displays a table with two columns: 'Version' and 'IP address'. There are two rows: one for v4 (192.168.1.1) and one for v6 (2001:4860:4860::8844). Each row has a 'Delete' button. A callout bubble labeled '5.1.1' points to the 'Delete' button for the v4 IP address. Below the table are 'Back' and 'Add' buttons.

Version	IP address	(2/6)
v4	192.168.1.1	Delete
v6	2001:4860:4860::8844	Delete

5.2 Click at the Apply **changes(5.1.2)** button to save changes.

The screenshot shows a confirmation dialog box with a large orange exclamation mark icon. The text asks: 'Are you sure you want to ip address '192.168.1.1'?'. Below the text are two buttons: 'Delete' (red) and 'Cancel' (gray). A callout bubble labeled '5.2.1' points to the 'Delete' button.
